homepage redirect
Inviato da farsheed - 27/06/2011 17:36

_____

Hi

I'm trying to redirect my homepage and if possible my entire site from sitename.com/ to [www.sitenam e.com/](www.sitename.com/)

how can I do this?

please help

homepage redirect
Inviato da farsheed - 27/06/2011 17:32

_____

Hi I'm trying to redirect from sitename.com/ to www.sitename.com/

I can't get it to work.

and if possible I'd like to do it for the rest of my site too. so that there are no URLS without www. on my site.

Thank you.

_____

With this version no.

ReDJ works on REQUEST_URI, so the domain part is ignored.

I'm planning to support full source url in the next version.

But you can do this with a simple rewrite rule in .htaccess file.

Best regards,

Luigi

Thx for your replay.. however I'm a lill dumb when it comes to the Htaccess file.

wat do I need to type in the htacces file? and where?

another question is does this website have an English version. .. it's hard to navigate around

_____

I'm working on a new english site dedicated to Joomla extensions..

Anyway, in the .htaccess file you shoudl add this just after RewriteEngine On:

Add www. to all URLs
RewriteCond %{HTTP_HOST} !^www.(.+)$ [NC]
RewriteRule ^(.*)$ http://www.%1/$1 [R=301,L]

If you need this also for https:

RewriteCond %{HTTP_HOST} !^www.
RewriteCond %{HTTPS}s ^on(s)|
RewriteRule ^ http%1://www.%{HTTP_HOST}%{REQUEST_URI} [R=301,L]

_____

Thank you ,

however, am I suppose to replace any of that code with my website name ? ..

cuz after I inserted that code .. I typed in jetsettravel.ca   in my browser .. and it redirects to this

 www..com/

thank you

_____

Maybe it can't get the cond backreference. Try this:

Add www. to all URLs
RewriteCond %{HTTP_HOST} !^www.(.+)$ [NC]
RewriteRule ^/(.*) http://www.jetsettravel.ca/$1 [R=301,L]

Let me know,

Luigi

Inviato da farsheed - 30/06/2011 15:28

_____

nope ..

same thing

redirects to the same www..com/

_____

nope.. I still get the same thing ..

it redirects to www..com
