Don't understand why redirects are not working
Inviato da jawks - 06/09/2011 01:15

_____

I've installed the plugin and read the whole documentation.

I´ve enabled the plugin, activated the early redirection option and moved the plugin to the first position.

I want this URL mydomain.com/tpv to get redirected to this other [mydomain.com/index.php?option=co](mydomain.com/index.php?option=com_content&view=article&id=160&catid=73&Itemid=535)
[m_content&view=article&id=160&catid=73&Itemid=535](mydomain.com/index.php?option=com_content&view=article&id=160&catid=73&Itemid=535)

So in the component I've typed the following:

FROM URL: ^/tpv*$

Published: Yes

TO URL: [mydomain.com/index.php?option=com_content&view=article&id=160&catid=73](mydomain.com/index.php?option=com_content&view=article&id=160&catid=73&Itemid=535)
[&Itemid=535](mydomain.com/index.php?option=com_content&view=article&id=160&catid=73&Itemid=535)

So I think I've done everything correctly but it doesn't get redirected. I just get the 404 error all the time.

Please can you help me??

_____

First, check that the name is .htaccess (two final "s").

If the problem persists, send me a mail at info(at)sistemistica.it and I will check settings for you.

Best regards,

Luigi

_____

Hi

I've downloaded the htaccess.txt file.

added ErrorDocument 404 / See a small section below.

Ive saved as .htaccess

I've uploaded this but my re-directs are still not wotking.

Any ideas please I'd be most grateful.

Have I added ErrorDocument 404 / in the correct place ?

and the requested path and file doesn't directly match a physical file

RewriteCond %{REQUEST_FILENAME} !-f

and the requested path and file doesn't directly match a physical folder

RewriteCond %{REQUEST_FILENAME} !-d

internally rewrite the request to the index.php script

RewriteRule .* index.php [L]

#ErrorDocument 404 /

End - Joomla! core SEF Section.

_____

Could you please post here your items? I need to check how you have configured redirects.

Also, check if the "system - redj" plugin is enabled.

Luigi

_____

Hi Luigi

Yes the Redj plug in is enabled and at the top of the order.

From Url /index.htm

To UL www.crosscountrymagazine.co.uk/index.php

301 (Moved Permanently)

Ticks in the next three boxes.

_____

Sorry just an addition

it does say From URL   www.crosscountrymagazine.co.uk/index.php

_____

Sorry but it seems that works for me.

Request:

(Request-Line) GET /index.htm HTTP/1.1

Response:

(Status-Line) HTTP/1.0 301 Moved Permanently
...
Location http://www.crosscountrymagazine.co.uk/index.php
...
Proxy-Connection keep-alive

Please advise.

Luigi

_____

Wow, yes you're right it is working now.

Perhaps I was readingfrom the cache.

Many thanks for your patience.
