

Regular expression assistance

Inviato da kmanson - 22/09/2011 13:52

We are using Joomla 1.5 with SEF urls. The issue is we are changing the a top menu title and this would like to setup a 301 permanent redirect. I have tried a few methods but i can't see to get the correct syntax.

old urls

sitename.com/solutions-and-services/justice-solutions/efiling

sitename.com/solutions-and-services/professional-services/ecommerce

etc...

new urls

sitename.com/software-solutions/justice-solutions/efiling

sitename.com/software-solutions/professional-services/ecommerce

etc...

Try to create this item:

From URL: /solutions-and-services/

To URL: `http://{siteurl}/software-solutions/{pathltrim /solutions-and-services/}{queryfull}`

This should work. Let me know.
