

404 error,

Inviato da baracuda - 18/10/2011 22:09

hello,

after 4 houers to try redirect some urls to my new site i found your plugin. so now i tried to configure it, but i still get 404 error, like when i try it myself via htaccess

so my config looks

from: /index.php/motos

to: www.ng-bikes.ch/fahrzeuge.html

and i added the ErrorDocument 404 / line at the end of the htaccess file

so, whats wrong? 😊

i just get this url, and thats wrong.

www.ng-bikes.ch/home/httpd/vhosts/ng-bikes.ch/httpdocs/fahrzeuge.html

so thats my content in htaccess

```

```
##  
# READ THIS COMPLETELY IF YOU CHOOSE TO USE THIS FILE!  
#  
# The line just below this section: 'Options +FollowSymLinks' may cause problems  
# with some server configurations. It is required for use of mod_rewrite, but may already  
# be set by your server administrator in a way that disallows changing it in  
# your .htaccess file. If using it causes your server to error out, comment it out (add # to  
# beginning of line), reload your site in your browser and test your sef url's. If they work,
```

it has been set by your server administrator and you do not need it set here.

##

Can be commented out if causes errors, see notes above.

Options +FollowSymLinks

Mod_rewrite in use.

RewriteEngine On

Begin - Rewrite rules to block out some common exploits.

If you experience problems on your site block out the operations listed below

This attempts to block the most common type of exploit `attempts` to Joomla!

#

Block out any script trying to base64_encode data within the URL.

RewriteCond %{QUERY_STRING} base64_encode[^(]*([^(])*) [OR]

Block out any script that includes a tag in URL.

RewriteCond %{QUERY_STRING} (|%3E) [NC,OR]

Block out any script trying to set a PHP GLOBALS variable via URL.

RewriteCond %{QUERY_STRING} GLOBALS(=|[[|%[0-9A-Z]{0,2}) [OR]

Block out any script trying to modify a _REQUEST variable via URL.

RewriteCond %{QUERY_STRING} _REQUEST(=|[[|%[0-9A-Z]{0,2})

Return 403 Forbidden header and show the content of the root homepage

RewriteRule .* index.php [F]

#

End - Rewrite rules to block out some common exploits.

Begin - Custom redirects

RewriteCond %{THE_REQUEST} ^[A-Z]{3,9} /([^\s/]+)* (index|home).html? HTTP/

RewriteRule ^((([^\s/]+)*)(index|home).html)?\$ http://www.ng-bikes.ch/\$1 [R=301,L]

#

RewriteCond %{THE_REQUEST} !^POST

RewriteCond %{THE_REQUEST} ^[A-Z]{3,9} /([^\s/]+)*index.php HTTP/

RewriteCond %{SERVER_PORT}>s ^((443>(s))|([0-9]+>s))\$

RewriteRule ^((([^\s/]+)*)(index.php)\$ http%2://www.ng-bikes.ch/\$1 [R=301,L]

#

RewriteCond %{HTTP_HOST} !^(www.ng-bikes.ch)?\$

RewriteRule (.* http://www.ng-bikes.ch/\$1 [R=301,L]

#

If you need to redirect some pages, or set a canonical non-www to

www redirect (or vice versa), place that code here. Ensure those

redirects use the correct RewriteRule syntax and the [R=301,L] flags.

#

End - Custom redirects

```
##
# Uncomment following line if your webserver's URL
# is not directly related to physical file paths.
# Update Your Joomla! Directory (just / for root).
##

# RewriteBase /

## Begin - Joomla! core SEF Section.
#
RewriteRule .* - [E=HTTP_AUTHORIZATION:%{HTTP:Authorization}]
#
# If the requested path and file is not /index.php and the request
# has not already been internally rewritten to the index.php script
RewriteCond %{REQUEST_URI} !^/index.php
# and the request is for something within the component folder,
# or for the site root, or for an extensionless URL, or the
# requested URL ends with one of the listed extensions
RewriteCond %{REQUEST_URI} /component/|(/[^.]*).(php|html?|feed|pdf|vcf|raw))$ [NC]
# and the requested path and file doesn't directly match a physical file
RewriteCond %{REQUEST_FILENAME} !-f
# and the requested path and file doesn't directly match a physical folder
RewriteCond %{REQUEST_FILENAME} !-d
# internally rewrite the request to the index.php script
RewriteRule .* index.php [L]
#
## End - Joomla! core SEF Section.
```

ErrorDocument 404 /

Inviato da admin - 18/10/2011 22:22

Hi,

I've checked and it seems to work. Have you solved?

=====

Re: 404 error,

Inviato da baracuda - 18/10/2011 22:48

hmm, not really, still get www.ng-bikes.ch/home/httpd/vhosts/ng-bikes.ch/httpdocs/fahrzeuge.html

error 404

old link www.ng-bikes.ch/index.php/motos new

www.ng-bikes.ch/fahrzeuge.html

and google just know the old

=====

Re: 404 error,

Inviato da admin - 18/10/2011 23:02

Here is the request:

```
(Request-Line) GET /index.php/motos HTTP/1.1
Host www.ng-bikes.ch
User-Agent Mozilla/5.0 (Windows NT 6.1; rv:7.0.1) Gecko/20100101 Firefox/7.0.1
Accept text/html,application/xhtml+xml,application/xml;q=0.9,*/*;q=0.8
Accept-Language it-it;q=0.8,en-us;q=0.5,en;q=0.3
Accept-Encoding gzip, deflate
Accept-Charset ISO-8859-1,utf-8;q=0.7,*;q=0.7
Connection keep-alive
```

And here the response:

```
(Status-Line) HTTP/1.1 301 Moved Permanently
Date Tue, 18 Oct 2011 22:00:03 GMT
Server Apache/2.2.3 (CentOS)
X-Powered-By PHP/5.2.6
Set-Cookie e5c348404702dd93c6474845f3214c74=56b5870c6ddbcbfb744cc06425c073a0; path=/
Location http://www.ng-bikes.ch/fahrzeuge.html
Content-Length 0
Keep-Alive timeout=5, max=10
Connection Keep-Alive
Content-Type text/html
```

Please check/clean your browser cache.

Best regards,

Luigi

Re: 404 error,

Inviato da baracuda - 19/10/2011 06:52

oh damn! what a f..... i tried it sooften, every f.... htacces code, deletet the file, deletet the cache and nothing worked.....

so, is something bad, to use this plugin and not directly write in the htacces for google and other searchengines?

=====

Re: 404 error,

Inviato da admin - 19/10/2011 10:08

There's something strange when you say:

every f.... htacces code

Why you need to add code in .htaccess? The only one changes is ErrorDocument directive.

If you like, I can check your settings. To do this, send me a mail at info(at)sistemistica.it with a temporary limited account (even a test env is good, if aligned to production env).

Cheers,

Luigi

Re: 404 error,

Inviato da baracuda - 19/10/2011 11:12

i tried code like this: RewriteRule ^index.php/motos(.*)\$ www.ng-bikes.ch/fahrzeuge.html \$1 [R=301,L]

with my old url from google to the new one. maybe just the same cache problem. it's more comfortable to do that via joomlaadministration with your extension.

Re: 404 error,

Inviato da admin - 19/10/2011 11:28

I agree,

that's the reason why I've created it... 🍌
