redirect remository urls

Inviato da fermu - 03/11/2011 19:39

Hi everyone

It's me again with more questions :-P Now i'm trying to redirect this kind of urls

www.fermu.com/component/option,com_remository/Itemid,30/func,fileinfo/id,121/lang,es/

to this one kind of urls

www.fermu.com/es/descargas?func=fileinfo&id=121

I've tried with this macro but not work

From URL: ^/component/option,com_remository/

To: http://{siteurl}/{preg_match 1}//lang,([^/]+)//i{/preg_match}/descargas?func=fileinfo&id={preg_match 1}//id=/([0-9]+)//i{/preg_match}

What am I doing wrong?

An one more question and i finish with this topic,

I need redirect from this type of urls

fermu.com/es/component/tag/mouse

fermu.com/es/component/tag/periodo

To:

fermu.com/es/component/gitags/periodo

fermu.com/es/component/gitags/mouse

So, i need to replace the word "tag" with the word "gitags. How i do it?

One more time, thank you very much and sorry for any inconvenience.

Almost perfect,

but you use an equal (=) instead of a comma (,)

To URL: http://{siteurl}/{preg_match 1}//lang,([^/]+)//i{/preg_match}/descargas?func=fileinfo&id={preg_match 1}//id,([0-9]+)//i{/preg_match}

To replace tag:

From URL: /component/tag/
TO URL: http://{siteurl}/{preg_match 1}//([^/]+)//i{/preg_match}/component/gitags/{preg_match 1}//tag/([^/]+)/i{/preg_match}

Cheers,

Luigi

can you believe that i spend more than two hours on this macro and couldn't see anything wrong?

now all works like a charm, thanks, thanks, thanks

Yeah,

but I have an "eagle eye"...
