

## Need some help with a redirect

Inviato da brilliantweb - 26/01/2012 14:14

---

Hi

I have made a serious go of getting this to work, but I clearly don't understand regex well enough.

As usual, this is now extremely urgent, so any input will be HUGELY appreciated.

I want to redirect

`/index.php ? option=com_kunena&func=showcat&catid=717&Itemid=389`

to

`/index.php ? option=com_kunena&func=showcat&catid=731&Itemid=389`

The only thing that changes is the catid.

Thanks

Brendon

Note: I put spaces before and after the question mark just so the links would show up in the forum.

Just escape th questio mark:

From URL: /index.php?option=com\_kunena&func=showcat&catid=717&Itemid=389

To URL: http://{siteurl}/index.php?option=com\_kunena&func=showcat&catid=731&Itemid=389

Best regards,

Luigi
