mass changing category
Inviato da yskan - 01/04/2012 17:40

____

Ive searched through the forums and have found a few topics about it but I still cant my redirect to work.

Ive changed a section from Tutorials into Artikelen

Old url examples:

www.shootnshop.nl/tutorials/basis/324-lasersword

www.shootnshop.nl/tutorials/fotografie/195-scherptediepte

Needs to be changed into new URL

www.shootnshop.nl/artikelen/basis/324-lasersword

www.shootnshop.nl/artikelen/fotografie/195-scherptediepte

How can i make all the items change section?

This is what ive got so far:

FROM: /tutorials/

TO: http://{siteurl}/artikelen/{pathltrim /tripscourses/}{queryfull}

Thanks in advance!

Hi,

try this:

From URL: /tutorials/
To URL: http://{siteurl}/artikelen/{pathltrim /tutorials/}{queryfull}

Kind regards,

Luigi

---

hi there,

I have the same problem but above code doesnt work for me. I use sh404sef, could this be problem?

thanks..

Joomla 1.5.24

VM 1.1.9

____

Maybe,

try to move ReDj plugin before any sh404SEF plugin. If this not solve, send me an email at info(at)sistemistica.it.

Kind regards,

Luigi

I Luigi,

i tried to do the same as you said here but i can't get it working.

My old url are:

www.lifeintravel.it/it/mountain-bike/itinerari-in-mtb/area-download/section/1-bicicletta.html

www.lifeintravel.it/it/mountain-bike/itinerari-in-mtb/area-download/category/5-trieste-sarajevo-i-balcani-a-pedali.html

and i'm tring to redirect this to

www.lifeintravel.it/it/area-download/section/1-bicicletta.html

www.lifeintravel.it/it/area-download/category/5-trieste-sarajevo-i-balcani-a-pedali.html

with this code:

FROM: /it/mountain-bike/itinerari-in-mtb/area-download

TO: http://{siteurl}/it/{pathltrim /mountain-bike/itinerari-in-mtb/}{queryfull}

What i get is a redirect loop with this url:

www.lifeintravel.it/it//it//it//it//it//it//it//it//it//it//it//it//it//it//it//it//it//it//it//it/mountain-bike/itinerari-in-mtb/area-download/section/1-bicicletta.html

Do you have any suggestions for me?

Thanks in advance,

Leo.

Inviato da admin - 20/04/2012 13:04

Yes,

try this:

From URL: ^/it/mountain-bike/itinerari-in-mtb/area-download/section/1-bicicletta.html
To URL: http://{siteurl}/it/{pathltrim /it/mountain-bike/itinerari-in-mtb/}{queryfull}

Kind regards,

Luigi

Thanks Luigi,

this is working well!!! 🙂

Thank for your quick reply and for ReDJ, great extension!!! 🙂
