The redirect dont work?
Inviato da gingerweb - 22/12/2012 10:11

_____

Hi.

thanks for this free component - it doesnt appear to be working for me despite it looking like exactly what i am after.

i have a new site which is replacing a very well indexed one and i have set a few URL's to redirect to the new ones but i just get Error 404 - component not found ?

the site is www.tridentmedical.co.uk/

i have enabled the plugin and set a url redirect for this url:

www.tridentmedical.co.uk/Courses/emergency-first-aid-at-work.html

to go to:

www.tridentmedical.co.uk/courses/first-aid-at-work/emergency-first-aid-at-work-course

but as you can see it doesnt work, i have tried a few fixes from this forum but nothing working yet. hope you can help.

thanks

_____

Sorry i have figured it out now;

my old URL is this :

www.tridentmedical.co.uk/Courses/emergency-first-aid-at-work.html

i must put in the Old URL link only:

emergency-first-aid-at-work.html

and then the same in for the new one - then it works great thanks !!
