Is it possible to Setup an EXE redirect

Inviato da dbarchiesi - 14/02/2013 17:49

We are changing the name and path of certain software Exes. Is there a way to setup a redirect to redirect users to the new EXE path.

Example

FROM

www.site.com/downloads/obs40/obs40.exe

TO

www.site.com/downloads/peeradmin/40/peeradmin40.exe

Thanks!

Yes, if the first URL return a 404 error. Normally, if the file exists, the web server send the file to browser without call Joomla. If the file returns an error, you can tell the web server to pass to Joomla (and ReDJ) any error, just adding this line at the end of .htaccess file:

ErrorDocument 404 /

Now you can create a rule to redirect the request using ReDJ:

From URL: ^/downloads/obs40/obs40.exe$
To URL: http://{siteurl}/downloads/peeradmin/40/peeradmin40.exe
Request only: true (must be checked)
Redirection type: 301

Best Regards,

Luigi
