

## Problem with Tag Meta

Inviato da zigi11 - 02/09/2010 22:03

---

I installed the component & plug-in and followed the instructions, all went smooth but I can't see the results. everything worked like a charm on my VM machine but on my live site it doesn't.

I'll give you an example of what i discovered while digging, maybe you have a clue for resolving it.

when creating the URI '/arts' for the URL - ' [vodcastdirectory.com/arts](http://vodcastdirectory.com/arts) ' and then looking at the source i see no change, but when navigating to ' [vodcastdirectory.com/index.php/arts](http://vodcastdirectory.com/index.php/arts)

' and checking the source i see the Tag Meta information. but the url with the 'index.php' is wrong and

leads to a wrong template.

Do you have an idea for resolving it. I love this component and i will love to use it.

Hi,

ther's nothing strange in .htaccess file.

On my local system REDIRECT\_URL works fine even with SOBI2. I don't know why this not happens on your live site. Should be veirified that \$\_SERVER['REDIRECT\_URL'] is not empty, but I can't do it for you on a production site.

Last thing, I really don't like the way SOBI2 works. It alters server variables as it needs, andcd this can cause many problems with other components (as in our case). To work with Tag Meta, as example, if you are not able to understand why REDIRECT\_URL is not set, you should understand how SOBI2 changes the REQUEST\_URI (or uninstall Tag Meta) and use these, but I think this is crazy.

If you still need help let me know (be advised we should work on production site).

Regards,

Luigi

Hi Luigi,

Sorry for disappearing.

So what you are saying is that I can't use Meta Tag ?

I'm not really into coding so I don't think I can alter something by myself.

Do you have any other idea ?

TNX,

gur

The clean way is to understand why "REDIRECT\_URL" is not set on your system. If you are using the .htaccess file it should.

Another way is to create Tag Meta item using "internal"; SObI2 URL, but I think this is crazy.

At this time I haven't more ideas. I would help you but should be better to have a test site.

Luigi
