Canonical + comments
Inviato da manuxx - 04/05/2011 09:39

_____

Hola, I just downloaded your component.

I don't understand the "canonical" tab and "comments" tab, theres no information on your Guide about it.

For what I read in google if I have several urls pointing to same direction the "canonical" tab will tell google the correct url to point at but how I write it in your component.

www.comenaranjas.com/variedades.html

or just:

variedades.html

Don't know if im using your component correctly, google webmaster tools says that "variedades" page still has duplicated metatags and that is using the global metatags from the site.

Thanks

Hi,

I'm working on a new version of tutorial, but unfortunately I get some personal problems in these days and I'm (very) late.

Meanwhile, about your question. The comment is just a sentence you can associate to an item as a kind of memo (I mean, there's no SEO implication).

The canonical, instead, can be much important (as you read on Google). It allows you to set the rel canonical on any page that match with the item. You can read on Google's guide how to use it correctly.

Le me know if you need more help.

Luigi

Hola Luigi

Thanks for answer, I'm getting a bit mad with setting metatags correctly. Google webmaster tools show me that my section: www.comenaranjas.com/variedades.html is using the global metatags so that metatags are repetaded from the initial page, however the code inside shows the metatags I wrote on your component.

About the canonical after reading I though I had set them correctly but seems like I haven't as seo analysis doesnt show that I have any canonical links set up correctly.

Naranjas | Mandarinas | Mixta de naranjas y mandarinas | Mixta de zumo y mesa

As you can see in the code it appears.

Theres something weird going on in my website, I changed the title of the site some days ago and It still appears and old title in google.

Thanks

Hi,

please consider that Google takes some times to refresh its info. How many times depend on the refresh frequency. In your webmaster tools you should see the last scan time. If this is older then your changes, you just need to wait...

Best regards,

Luigi
