Works in Firefox but not in IE and Chrome?!
Inviato da Robert - 02/06/2011 03:31

_____

Hello!

Hope you all can help me with this one!

I installed Tagmeta 1.3 on the following site : www.thailandresort.se/

I Choose the option to display the Site Name (Thailandresort, Hua Hin, Thailand) after the Article name in the plugin Settings.

The Site name displays correctly in Firefox (latest version) but it wont show up in IE and Chrome (latest versions). In IE and Chrome only the article/page name shows up.

Need help badly.

Tagmeta not working in IE and Chrome
Inviato da Robert - 02/06/2011 03:36

_____

Hello.

Im using Tagmeta 1.3 on this site : www.thailandresort.se

Im mainly using Tagmeta to show my site name (Thailandresort, Hua Hin, Thailand) after the article/page names.

This works very well in Firefox, but dont work at all in Chrome or IE (all have latest versions)

Any help with fixing this would be apriciated.

I cleared Cache both Server side and Client side in the browsers.

Hi,

sorry but what you say is really strange, because Tag Meta works on server side and it never check about the user agent (the browser identification).

Just now I've tested with IE and Firefox and results are the same. Are you sure is not a cache problem?

Luigi
