

Remove [site name] from page title

Inviato da JonoCow - 02/12/2011 06:06

Hello, I have a question about this excellent tool.

In the plugin I am using:

Add site name to page title: After

Is it possible in the component to make 1 page NOT follow this rule?

Thanks!

- Jono

Hi,

this is a good question, and the answer is no. Unfortunately the item rule is applied before global settings, so is not possible to use an item to exclude a page or a group of page.

But this is a feature I will try to add in the next version.

Best regards,

Luigi
