

Installed, entered URI, but does not work

Inviato da vishal - 29/07/2009 19:06

I am trying desperately to get title tags to display for my pages. I have jreviews installed. The page title I am trying to customize is shown here www.mechanicshub.com/equipment-truck-industry-news.html

I have also attached a screenshots of the backend settings. please help.

Ok,

let's solve together...

Send me your item configuration and plugin settings for Tag Meta.

Luigi
