

How to write keywords in Tag Meta

Inviato da karen444 - 30/07/2009 15:40

Hi!

I am a bit confused on how to write the keywords correctly in the Tag Meta Software, and this is really important because if will not be practical if I do it wrong.

You say not to insert spaces, but I do not understand what that means.

For example, one of my keywords is natural remedies for dogs. How would I write it in your software?

- 1) ... , natural remedies for dogs, ...
- 2) ...,natural remedies for dogs,...
- 3) ...,naturalremediesfordogs,...

Please specify the correct way by 1, 2, or 3. Or please give me an example.

Thank you,

Karen
