Tag Meta Componet Problem

Inviato da hexagon - 05/08/2009 10:40

Hi,

I have installed both plugin and component V1.2.

I have enabled plugin and checked ok.

I have been trying to test component on the following url:

www.hexagon-propertymanagement.co.uk/site-map

I believe that I need to enter the URL in Tag Meta as follows: /site-map

I can't seem to get this to work.

Please help!

Thanks in advance

James

Hi,

it seems you do all the right way. Could you, please, send me dump of Tag Meta table?

Luigi

---

i hope this is in a ok format?

"1";"/site-map";"TEST";"TEST";"test";"1";"1";"2";"2";"2";"1";"1";"0";"0000-00-00 00:00:00"

Ok,

it must work. Send me your Tag Meta plugin settings, and also check if you have cache enabled...

==========

Re:Tag Meta Componet Problem

Inviato da hexagon - 05/08/2009 11:14

Hi,

Enabled: **Yes**

Alternative Site Name (Optional) : **Blank**

Site Name Position: **Before Page Title**

Title Separator: **{s}-{s}**

Only Site Name on Default Page: **No**

I am correct in the cache setting on Global Config/System? Currently set to: **NO**

Thanks

Ok,

the last check should be made on your plugins. Are you able to send me a screenshot of all (and only) enabled plugins?

Luigi

Thanks but, sorry, where is Tag Meta?

It seems there something missing. You can take a full page shot using Firefox with screengrab plugin.

_____

I have just had a terrible sense of stupidy!!

your plugin isn't called Title Manager is it?? No yours is called Tag Meta.

I am so sorry for being such an idiot and wasting your time.

My appologies

James
